

Press Release

Full Stream Ahead! **Steam Engine driver joins Actons**

Actons' highly regarded Employment Law team has continued to build on its success with the appointment of Charlotte Crampton who will specialise in both commercial litigation and employment law. Charlotte qualifies as a Solicitor after spending time with Actons as placement student on her law degree, then as a paralegal and finally completing her training contract with the firm. She is also an Associate Member of the Employment Lawyers Association.

Whilst away from the office, Charlotte has passed her Class G category of driving licence which means she is licensed to drive steam engines. She is interested in the preservation and restoration of vintage steam engines, which stems from her family's interest. She has also helped to restore her family's steam roller and another is in progress. Charlotte, who was born and brought up in Derby and continues to live there, is on the committee of a charity steam rally which has raised over £20,000 for local Derbyshire and Staffordshire charities over the last 9 years.

Director and Head of the Employment Law Team Claire Bell said "We are delighted to welcome Charlotte to the team. Charlotte has demonstrated her commitment to the firm over the past five years and I am sure it will be 'full steam ahead' for her career now that she has qualified."

Charlotte's appointment highlights Actons' continued investment in personnel who can maintain and strengthen the Firm's ability to offer clients the full range of commercial services.

For further information, please contact the Employment Law team on 0115 9 100 200 or alternatively email enquiries@actons.co.uk

Ends: August 2006
